Cenchester

Dear Mr. Typesetter,

We hope this letter finds you well! Happy New Year to you and yours. We hope you are settling back in well after the holidays. We have a couple of quick questions for you.

We seek some clarification regarding the Union restrictions on hiring. Our understanding is PPL can hire an additional 70 staff, and must adhere to a ratio of 1 supervisor to every 10 staff, 2 masters to every apprentice, and 1 shift leader per shift. We would like to confirm are supervisors included in the Union restrictions?

We understand there are two pallet choices available to PPL for storage: wooden and plastic. Do you know the weight limits for each of these pallets? Is there a generally accepted recommended weight or maximum weight they can hold?

With regards to the machinery required to print the books, the letter you received from Superior Print Machines mentioned the TP5000 which is due to launch in mid-2018. Would it be possible to obtain quotes on this machine as it could assist our analysis.

The letter we received from Printmaster outlined that the Bookmaster can print 50 books per hour based on a book of 200-280 pages. Taking an average of 240 pages, and considering Pulp Novels' average of 220 pages, can we assume an average output of 54 books per hour using this machine?

Finally, in the letter received from Print Technology they quoted the Printura III at a cost of £190,000 excluding VAT. Can we assume that all other prices are quoted with VAT excluded?

Thanks for your time. If you seek clarification on any of the above do not hesitate to ask.

Yours sincerely,

David Creavy
